

Environmental Policy

Why do we have this Policy?

The company is committed to conducting and improving our environmental performance in a manner to reduce adverse environmental impacts

Policy Summary:

The **Company** will endeavor to minimise impact on the following:

- Atmospheric emissions
- Site contamination and spills
- Noise emission, dust and vibration
- Damage to flora and fauna
- Storm water management
- Unnecessary energy consumption
- Waste management and disposal
- Water conservation

To fulfill this commitment, the Company will observe all environmental laws and promote environmental awareness among all employees, to increase understanding of environmental matters.

The **Company** actively takes part in the following:

- Assessing Eco-footprint to identify environmental impacts and using more sustainable practices
- Providing service that meets or exceeds relevant Statutory Legislation Industry Guidelines appropriate to current AS & ISO standards
- Seeking appropriate licences/permits from State Environmental Protection Agencies and other relevant Authorities
- Improving education/awareness by training employees in good environmental practices and safe handling of materials. Such training will include addressing specific environmental issues relevant to their work activities
- Investigating all incidents of inappropriate disposal of waste
- Ensuring that relevant authorities are contacted in the event of a major environmental impact
- Allocating employees to monitor objectives, set targets and establish new systems to progressively minimise environmental impact by setting measurable goals
- Providing a system that ensures that plant is of a high standard through a rigorous maintenance and inspection program which is designed to reduce impacts of poor machinery performance
- Continually improve the effectiveness of the management system

Breaches of Environmental policy will be treated very seriously and disciplinary action will be taken where necessary.
